RESILIENT CHAUTAUQUA COUNTY

Ready for Change. Built to Thrive.

We need your input to shape the Countywide Resiliency Plan!

> *Resilience is the ability for a community and its ecosystems to adapt and withstand impacts from climate change including extreme weather and other disruptive events; to recover quickly and bounce back across social, economic, and ecological systems; to continue functioning in the aftermath of a disaster; and adapt to rapidly changing environmental conditions and forces.*
>
> *- Resilient NY (resilient.ny.gov)*

Chautauqua County is already experiencing the impacts of flooding, severe storms, and changing climate conditions that threaten important social, economic, and environmental resources. The Countywide Resiliency Plan (CRP) will help communities prepare for these challenges by identifying key vulnerabilities and outlining practical strategies to not only protect infrastructure, natural assets, and quality of life, but also to recover more quickly from hazard events and rebuild stronger than before.

Building on past planning efforts and input from local municipalities, residents, and stakeholders, the CRP will serve as a guide for future decision-making - helping to prioritize projects, foster partnerships, and position the County to secure funding for resiliency improvements. Ultimately, this effort will support a stronger, safer, and more adaptable Chautauqua County for years to come.
